

## Environmental Policy

At Freestone we apply the utmost in creative thinking to everything we do. In delivering design and marketing solutions to our national and international clients, we recognise that our activities can have an impact on the environment and that the changing environment can also have an impact on our activities.

We are working to improve our environmental performance and commit to ensuring protection of the environment by operating under the control of an Environmental Management System. It is our policy to seek to operate in accordance with the requirements of BS EN ISO 14001:2015 and will work to build good environmental management into our business processes.

Implementation and operation of the management system has provided a framework, which ensures the company's significant aspects, environmental objectives and targets are being identified, monitored and met.

We have made a commitment to identify and fulfil all relevant compliance obligations with regard to environmental management.

We are also committed to working towards continual improvement of the Environmental Management System to enhance our environmental performance, prevention of pollution, minimising waste and efficient use of energy as this relates to our activities products and services.

Responsibility for upholding this policy is truly Company-wide, under the guidance of the Directors, who encourage all staff to address environmental issues through their own creative thinking and commitment.

This policy is communicated to all persons working for, or on behalf of the organisation, and is available to interested parties via our website.
